

TOM COREY

tomcorey.dev ◇ github.com/tomcorey26

SUMMARY

Frontend-leaning full-stack engineer with 6 years shipping production web applications. Deep in TypeScript, React, and modern frontend architecture, with full-stack reach across Node.js services. Uses Claude Code and agentic workflows daily

SKILLS

Languages	TypeScript/JavaScript, C#, SQL
Frontend	React, Next.js, Tailwind, Vue
Backend	Node.js, .NET, REST APIs
AI Tooling	Claude Code, agent workflows, prompt engineering

EXPERIENCE

Full-Stack Software Engineer DealerOn	Jan 2021 - Present <i>Remote</i>
---	-------------------------------------

- Sole frontend owner of dealer-facing pricing configuration application serving 7,000+ automotive dealerships. The system controls vehicle pricing, financing offers, and promotional CTAs across every dealer website on the platform
- Rebuilt a legacy AngularJS feed-configuration tool as a modern React application, letting operations teams self-serve third-party inventory feed setup (sources, priority order, categories like stock/pricing/photos); tested end-to-end with Playwright/Vitest
- Drove adoption of React 19 across the team's apps: authored the analysis and proof-of-concept PR that made the migration the prerequisite for a shared component library, sparking the modernization effort and personally migrating one of the apps.
- Delivered full-stack integrations with 10+ major partners including Ford, GM, and Capital One
- Contributed across a 4-service inventory pipeline processing 200,000+ daily vehicle updates; extended priority-queue handling across 3 services to support 10 priority levels

Earlier Experience	Jan 2020 - Dec 2020
---------------------------	---------------------

- **Software Engineer (Contract)**, CVS Health — Built TypeScript/React tool for automated API proxy generation on Google Cloud Apigee, supporting public CVS Health API infrastructure
- **Software Engineer**, Maverick Investment Technologies — Developed React-based financial analysis platform with real-time stock data visualization and PHP REST API integration

PROJECTS

LogBro (logbro.tomvolt.com, github.com/tomcorey26/LogBro)

Time-blocking web app for tracking deliberate skill practice. Solo-built with Next.js 16, React 19, TypeScript, Drizzle/SQLite, and custom JWT auth. Developed using Claude Code agent workflows.

Speech Islands (speechislands.com)

Full-stack language learning platform built with React, Node.js, and Next.js; integrates OpenAI API for AI-generated personalized vocabulary flashcards.

EDUCATION

Bachelor of Computer Science, The University of Rhode Island
